

## Labor Market Assessment: 0201.00 – Architecture and Architectural Technology

### Architecture – University Transfer (Associate Degree)

Los Angeles Center of Excellence, April 2022

#### Summary

<b>Program Endorsement:</b>	<b>Endorsed:</b> All Criteria Met <input type="checkbox"/>	<b>Endorsed:</b> Some Criteria Met <input checked="" type="checkbox"/>	<b>Not</b> Endorsed <input type="checkbox"/>
<b>Program Endorsement Criteria</b>			
<b>Supply Gap:</b>	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/> (see comments below)	
<b>Living Wage:</b> (Entry-Level, 25 <sup>th</sup> )	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>	
<b>Education:</b>	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>	
<b>Emerging Occupation(s)</b>			
Yes <input type="checkbox"/>		No <input checked="" type="checkbox"/>	

The Los Angeles Center of Excellence for Labor Market Research (LA COE) prepared this report to provide regional labor market supply and demand data related to three middle-skill occupations:

- *Architectural and civil drafters* (17-3011);
- *Electrical and electronics drafters* (17-3012); and
- *Mechanical drafters* (17-3013).

Middle-skill occupations typically require some postsecondary education, but less than a bachelor's degree.<sup>1</sup> This report is intended to help determine whether there is demand in the local labor market that is not being met by the supply from community college programs that align with the relevant occupations.

Based on the available data, there appears to be a slight supply gap for the occupations of interest. Upon closer inspection, the supply is within the COE's acceptable margin (25% over or under the number of annual openings) and is therefore considered "supply met" rather than a "supply gap." While this program does not meet the traditional supply/demand endorsement criteria, there may be demand for these workers from local employers that is not reflected in traditional labor market data. For this reason, real-time labor market data is included in this report as well – to provide a more nuanced view of the regional job market for these middle-skill occupations related to drafting technology. In addition to all three occupations having entry-level wages that exceed the self-sufficiency standard wage in both Los Angeles and Orange Counties, the Bureau of Labor Statistics lists an associate degree as the typical entry-level education for each occupation. **Due to some of the criteria being met, the LA COE endorses this proposed program.** Detailed reasons include:

<sup>1</sup> The COE classifies middle-skill jobs as the following:

- All occupations that require an educational requirement of some college, associate degree or apprenticeship;
- All occupations that require a bachelor's degree, but also have more than one-third of their existing labor force with an educational attainment of some college or associate degree; or
- All occupations that require a high school diploma or equivalent or no formal education, but also require short- to long-term on-the-job training where multiple community colleges have existing programs.

### Demand:

- **Supply Gap Criteria** – Over the next five years, there is projected to be **673 jobs available annually** in the region due to retirements and workers leaving the field, **which is slightly more than the 627 awards conferred annually** by educational institutions in the region.
  - Although there are nearly as many awards conferred as job openings, the data suggests that the **demand has been met for these occupations within the LA/OC region** since the three-year average number of awards (supply) is within the COE's 25% margin of annual job openings (demand).
- **Living Wage Criteria** – In Los Angeles County, all three occupations studied in this report have **entry-level wages above** the self-sufficiency standard wage (\$18.10/hour).<sup>2</sup>
- **Educational Criteria** – The Bureau of Labor Statistics (BLS) lists an **associate degree** as the **typical entry-level education** for the occupations in this report.
  - Furthermore, national-level educational attainment data indicates that **between 53% and 57% of workers in the field have completed some college or an associate degree.**

### Supply:

- Between 2017 and 2020, **20 community colleges** in the LA/OC region issued awards in programs that have historically trained for the occupations of interest, conferring an average of **615 awards**.
- Between 2016 and 2019, non-community college institutions in the LA/OC region conferred an average of **12 awards in relevant programs**.

---

<sup>2</sup> Self-Sufficiency Standard wage data was pulled from The Self-Sufficiency Standard Tool for California. For more information, visit: <http://selfsufficiencystandard.org/california>.

## Occupational Demand

Exhibit 1 shows the five-year occupational demand projections for the three occupations of interest. In the Los Angeles/Orange County region, the number of jobs related to these occupations is projected to decrease by 4% through 2025. However, there will be nearly 700 job openings per year through 2025 due to retirements and workers leaving the field.

*This report includes employment projection data by Emsi which uses EDD information. Emsi's projections are modeled on recorded (historical) employment figures and incorporate several underlying assumptions, including the assumption that the economy, during the projection period, will be at approximately full employment. To the extent that a recession or labor shock, such as the economic effects of COVID-19, can cause long-term structural change, it may impact the projections. At this time, it is not possible to quantify the full impact of COVID-19 on projections of industry and occupational employment. Therefore, the projections included in this report do not take the full impacts of COVID-19 into account.*

**Exhibit 1: Occupational demand in Los Angeles and Orange Counties<sup>3</sup>**

Geography	2020 Jobs	2025 Jobs	2020-2025 Change	2020-2025 % Change	Annual Openings
Los Angeles	4,573	4,317	(256)	(6%)	417
Orange	2,716	2,667	(49)	(2%)	255
<b>Total</b>	<b>7,289</b>	<b>6,984</b>	<b>(305)</b>	<b>(4%)</b>	<b>673</b>

## Wages

The labor market endorsement in this report considers the hourly wages for the occupations in Los Angeles County, as they relate to the county's self-sufficiency standard wage. Orange County wages are included below in order to provide a complete analysis of the greater LA/OC region. Detailed wage information, by county, is included in Appendix A.

**Los Angeles County** – All three occupations in this report have entry-level wages above the self-sufficiency standard wage for one adult (\$18.10 in Los Angeles County). Typical entry-level hourly wages are in a range between \$22.51 and \$25.80; experienced workers can expect to earn wages between \$36.69 and \$38.45.

**Orange County** – All three occupations in this report have entry-level wages above the self-sufficiency standard wage for one adult (\$20.63 in Orange County). Typical entry-level hourly wages are in a range between \$23.45 and \$26.79; experienced workers can expect to earn wages between \$37.95 and \$40.15.

---

<sup>3</sup> Five-year change represents new job additions to the workforce. Annual openings include new jobs and replacement jobs that result from retirements and separations.

## Job Postings

Over the past 12 months, there have been 292 online job postings related to the three occupations in this report. Exhibit 2 displays the number of job postings by occupation. The majority of job postings (46%) were for *mechanical drafters*, followed by *architectural and civil drafters* (28%), and *electrical and electronics drafters* (26%). The highest number of job postings were for drafters, architectural drafters, CAD drafters, electrical designers, and mechanical designers. The top skills were computer aided drafting/design (CAD), Revit, calculation, SolidWorks, and 3D modeling/design. The top employers, by number of job postings, in the region were Actalent, VCA Consultants, and Coffman Engineers.

*It is important to note that the job postings data included in this section reflects online job postings listed in the past 12 months and does not yet demonstrate the full impact of COVID-19. While employers have generally posted fewer online job postings since the beginning of the pandemic, the long-term effects are currently unknown.*

**Exhibit 2: Job postings by occupation (last 12 months)**

## Educational Attainment

The Bureau of Labor Statistics (BLS) lists an associate degree as the typical entry-level education for each occupation in this report. Furthermore, national-level educational attainment data indicates that between 53% and 57% of workers in the field have completed some college or an associate degree.

## Educational Supply

**Community College Supply** – Exhibit 3 shows the annual and three-year average number of awards conferred by community colleges in programs that have historically trained for the occupations of interest. The colleges with the most completions in the region are Mt. San Antonio, East LA, Cerritos, Orange Coast, and Rio Hondo.

**Non-Community College Supply** – For a comprehensive regional supply analysis, it is important to consider the supply from other institutions in the region that may provide training programs for the occupations in this report. Exhibit 4 shows the annual and three-year average number of awards conferred in relevant programs. Due to different data collection periods, the most recent three-year period of available data is from 2016 to 2019. Between 2016 and 2019, non-community college institutions in the region conferred an average of 12 awards.
