

July 2022

The North/Far North Center of Excellence is sharing a quarterly bulletin of findings on jobs postings, unemployment, industry measures, and other real-time data. Some data points that we have traditionally used do not reflect the current economic disruption due to COVID-19.

SUMMARY

This edition of the COE economic update features analysis of unemployment, labor force, industry sector employment, and jobs postings data. It also includes a summary of recent reports.

Research for the July 2022 economic update indicates that the North/Far North region has experienced a strong recovery in most sectors and expansion of a few. The region, like much of the nation, has historic low unemployment. Unemployment rates are below pre-pandemic levels. The data do not yet indicate a cooling labor market or layoffs. Key findings are as follows:

- In May, the Greater Sacramento (North) region had an average unemployment rate of 3.0%. In the Far North, the average rate declined to 3.5%. The rate in California was 3.8%.
- The North region's labor force has risen steadily during the second half of 2021 and first half of 2022. In May, the labor force for the North was 3.3% larger than in January 2018. By contrast, the Far North's labor force was 3.2% smaller than in January 2018.
- Most sectors in the North/Far North have recovered from job losses experienced during the pandemic. Retail, government, and health care were resilient, but did not grow.
- Hospitality has made a remarkable comeback, regaining most of the job losses from the pandemic. In May, the Far North had 3.0% more jobs in the sector than in January 2020. In the North, the sector had 4.6% fewer jobs than in January 2020. The figures are dramatically higher than at the same time in 2021.
- Construction and transportation and logistics have seen significant growth over pre-pandemic employment levels. Between January 2020 and May 2020, construction's employment total increased 13.6% in the North and 19.0% in the Far North. The transportation and logistics sector's employment total increased 10.5% in the North and 14.6% in the Far North. Manufacturing's employment total increased 7.9% in the Far North.
- A quarterly analysis of jobs postings volumes shows that in many sectors these volumes continue to increase beyond pre-pandemic levels. In recent quarters, many sectors routinely had 20% to 50% higher postings volumes than before the pandemic. The increase is one indicator of hiring challenges.

UNEMPLOYMENT AND LABOR FORCE TRENDS

Unemployment

Unemployment rates continued to drop in the first five months of 2022 in the North/Far North region and have dipped below the historic lows of the months preceding the pandemic (Exhibit 1). Unemployment rates have not yet shown a reaction to downturns in the market caused by supply chain bottlenecks, inflation, and increasing interest rates. In May, in the Greater Sacramento region, the average unemployment rate was 3.0%. In the Far North, the average rate declined to 3.5%. The rate in California was 3.8%.

Exhibit 1. Unemployment rates (%), Greater Sacramento (North) and Far North subregions and California, selected months, January 2020–May 2022

Source: California Employment Development Department, Labor Market Information Division (LMID), Labor Force and Unemployment, <https://www.labormarketinfo.edd.ca.gov/data/unemployment-and-labor-force.html>.

Note: Unemployment rates are averaged across the counties of each subregion.

Exhibits 2 and 3 display the unemployment rates for selected counties in the North/Far North region immediately before the pandemic (January 2020), at the height of closures (April 2020), and this spring (May 2022). In May, many counties had unemployment rates below 3%. Most counties in the North/Far North region had unemployment rates 1.3% to 2.8% lower than rates in January 2020.

Exhibit 2. Unemployment rates (%) and percent change, Greater Sacramento (North) subregion by county, January 2020–May 2022

County	Jan 2020	April 2020	May 2022	% change Jan 2020 to May 2022	% change April 2020 to May 2022

Labor force

After experiencing ups and downs through the first half of 2021, the Greater Sacramento (North) region’s labor force grew steadily during the second half of 2021 and first half of 2022 (Exhibit 4). In May, the North’s labor force was 3.3% larger than in January 2018 and 1.0% larger than in March 2020.

California and the Far North experienced labor force reductions with the onset of the pandemic. The Far North’s labor force had partially recovered by mid-2021, but it shrank again at the end of 2021. Overall, the subregion has not regained the labor force numbers it lost during the pandemic. In May, the Far North’s labor force was 3.2% smaller than in January 2018.

Exhibit 4. Civilian labor force, North/Far North subregions and California, monthly trend, January 2018–May 2022 (indexed to January 2018)

Source: California Employment Development Department, Labor Market Information Division (LMID), Labor Force and Unemployment, <https://www.labormarketinfo.edd.ca.gov/data/unemployment-and-labor-force.html>.

INDUSTRY TRENDS

Between January 2020 and May 2022 in the Greater Sacramento (North) subregion, job numbers in retail trade, government, manufacturing, and health care were between 2% and 5% above pre-pandemic employment levels (Exhibit 5). Jobs numbers surpassed January 2020 levels by 13.6% in construction and by 14.6% in transportation and logistics. Compared with January 2020 levels, jobs numbers in the hospitality sector remain 4.5% lower and in the information sector, 11.2% lower.

With a few notable exceptions, industry trends in the Far North are similar to those in the Greater Sacramento (North) subregion. Compared with January 2020 employment levels, May 2022 employment levels in the subregion’s hospitality sector are 3% higher. In the manufacturing sector, they are 7.9% higher, and in the construction sector, they are 19% higher. But they are lower in government (-3.4%) and health care (-2.6%).

Exhibit 5. Percentage change in employment, North/Far North subregions, January 2020–May 2022

Sources: Employment data—California Employment Development Department, Labor Market Information Division, Current Employment Statistics (CES), <https://www.labormarketinfo.edd.ca.gov/cgi/dataanalysis/areaselection.asp?tablename=ces>.

Employment levels increased across the economy in the North/Far North between May 2021 and May 2022 (Exhibit 6). The gains were largest in the hospitality sector, where employment levels increased by 9.9% in the Far North and by 15.2% in the Greater Sacramento (North). Employment levels in transportation and logistics grew by 4.4% in the Far North and by 11.7% in the North. In all other analyzed sectors, they grew between 2.0% and 4.6%.

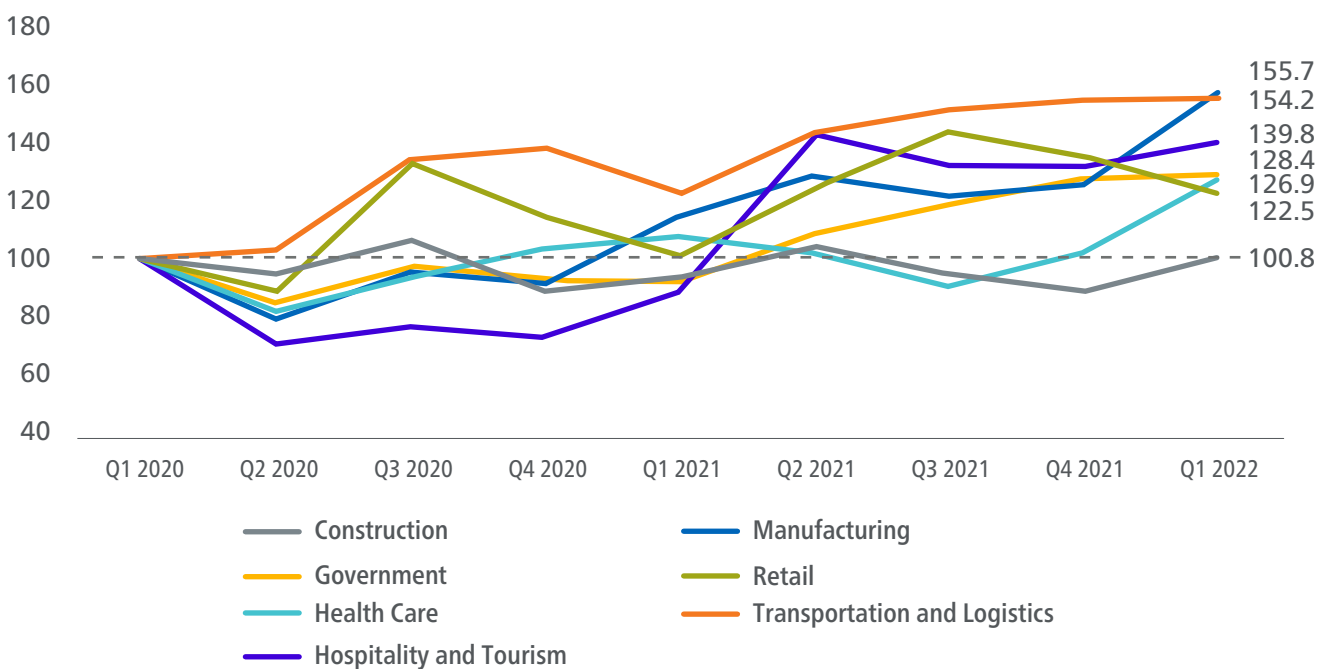

Exhibit 6. Percentage change in employment, North/Far North subregions, May 2021–May 2022

Sources: Employment data—California Employment Development Department, Labor Market Information Division, Current Employment Statistics (CES), <https://www.labormarketinfo.edd.ca.gov/cgi/dataanalysis/areaselection.asp?tablename=ces>.

Exhibit 7 displays an index of quarterly job postings for key industry sectors (transportation and logistics, manufacturing, hospitality and tourism, government, health care, and retail) in the North/Far North region. In several sectors, jobs postings volumes increased throughout 2021; in Q1 2022 they were 22.5% to 55.7% higher than in Q1 2020. Jobs postings volumes in construction experienced seasonal increases but remained consistent between Q1 2020 and Q1 2022.

Exhibit 7. Job postings volume trends in the North/Far North region, by industry sector, Q1 2020–Q1 2022 (indexed to Q1 2020)

REPORT SPOTLIGHTS AND NEWS

Artificial Intelligence (A.I.) labor market analysis in the Greater Sacramento subregion

In May 2022, the North Center of Excellence released a labor market analysis for artificial intelligence, or A.I., a field for which the Bureau of Labor Statistics has no well-defined occupations. Two occupations commonly found in the field are software developer and data scientist. Over the next five years, 965 annual openings for these two occupations are projected in the North (Greater Sacramento) subregion. Most of these openings will be for software developers.

In addition to traditional and real-time labor market data, the analysis examines A.I. skill demand and the top occupations using A.I. skills in the Greater Sacramento region. It reveals low demand for workers with these skill sets. In the last 12 months, 716 online jobs postings requested A.I. skill sets. And these postings were concentrated in occupations that typically required at least a bachelor's degree.

Real estate labor market analysis in the Greater Sacramento subregion

The North Center of Excellence released a report on real estate occupations in the Greater Sacramento subregion in May 2022. The analysis found significant demand for real estate occupations, especially property managers and real estate agents, over the next five years. In the North (Greater Sacramento) subregion, 1,029 annual openings for real estate jobs are projected through 2025.

Although demand is particularly high for real estate occupations in the Greater Sacramento area, the North COE cautions community colleges about pursuing new real estate training programs. Real estate training, in various modalities, is available through multiple private postsecondary training providers in California, and supply information for this training is extremely limited or unavailable. Supply data are available only for community colleges. As a result, the supply gap (the difference between demand and supply) may be overestimated.

JOBS POSTINGS DETAIL

Presented here are detailed jobs postings data for the top employers, occupations, and skills in selected sectors in the North/Far North subregions from March 18, 2022, to June 15, 2022. Sector definitions come from existing industry crosswalks and the closest available sector information.

How to use the data:

- Top employers are potential industry partners for implementing targeted workforce development strategies.
- Top occupations, especially those shared by multiple priority sectors, highlight opportunities for developing new career education programs. Please note that occupations have not been filtered for educational requirements.
- Top skills present opportunities for further workforce development, but with a focus on skills development. These most-in-demand skills can be incorporated into existing coursework or built into new programs. Frequently requested skills, especially those listed in multiple priority sectors, may also suggest short-term certificate development areas.
- Priority sectors illuminate opportunities for cross-sector collaborations with multiple regional directors and industry partners.
