Emerging Occupation(s)						
Yes			<input type="checkbox"/>			
No			<input checked="" type="checkbox"/>			

The Los Angeles Center of Excellence for Labor Market Research (LA COE) prepared this report to provide regional labor market supply and demand data related to two middle-skill occupations:

- *Medical assistants (31-9092) and*
- *Medical secretaries and administrative assistants (43-6013).*

Middle-skill occupations typically require some postsecondary education, but less than a bachelor's degree.¹ This report is intended to help determine whether there is demand in the local labor market that is not being met by the supply from community college programs that align with the relevant occupations.

Based on the available data, there appears to be a supply gap in the region for the two occupations of interest. Although entry-level wages are below the self-sufficiency standard wage in both Los Angeles and Orange counties, the majority of current workers in the field have completed some college or an associate degree. **Therefore, due to some of the criteria being met, the LA COE endorses this proposed program.** Detailed reasons include:

Demand:

- **Supply Gap Criteria** – Over the next five years, nearly **8,500 jobs are projected to be available annually** in the region due to new job growth and replacements, **which is more than the 3,948 awards conferred annually** by educational institutions in the region.

¹ The COE classifies middle-skill jobs as the following:

- All occupations that require an educational requirement of some college, associate degree or apprenticeship;
- All occupations that require a bachelor's degree, but also have more than one-third of their existing labor force with an educational attainment of some college or associate degree; or
- All occupations that require a high school diploma or equivalent or no formal education, but also require short- to long-term on-the-job training where multiple community colleges have existing programs.

- **Living Wage Criteria** – In Los Angeles County, both occupations have **entry-level wages below the self-sufficiency standard hourly wage** (\$18.10/hour).²
- **Educational Criteria** – In the LA/OC region, **51% of the annual job openings** for the occupations of interest **typically require a high school diploma or equivalent**.
 - However, national-level educational attainment data indicates that **between 53% and 65% of workers in the field have completed some college or an associate degree**.

Supply:

- Between 2017 and 2020, **16 community colleges** in the LA/OC region issued awards in programs that have historically trained for the occupations of interest, conferring an average of **629 awards**.
- Between 2016 and 2019, non-community college institutions in the LA/OC region conferred an average of **3,319 awards in relevant programs**.

² Self-Sufficiency Standard wage data was pulled from The Self-Sufficiency Standard Tool for California. For more information, visit: <http://selfsufficiencystandard.org/california>.

Occupational Demand

Exhibit 1 shows the five-year occupational demand projections for the two occupations of interest. In the Los Angeles/Orange County region, the number of jobs related to these occupations is projected to increase by 7% through 2025. There will be nearly 8,500 job openings per year through 2025 due to job growth and replacements.

This report includes employment projection data by Emsi which uses EDD information. Emsi's projections are modeled on recorded (historical) employment figures and incorporate several underlying assumptions, including the assumption that the economy, during the projection period, will be at approximately full employment. To the extent that a recession or labor shock, such as the economic effects of COVID-19, can cause long-term structural change, it may impact the projections. At this time, it is not possible to quantify the full impact of COVID-19 on projections of industry and occupational employment. Therefore, the projections included in this report do not take the full impacts of COVID-19 into account.

Exhibit 1: Occupational demand in Los Angeles and Orange Counties³

Geography	2020 Jobs	2025 Jobs	2020-2025 Change	2020-2025 % Change	Annual Openings
Los Angeles	48,165	51,191	3,027	6%	6,118
Orange	17,461	19,150	1,689	10%	2,370
Total	65,625	70,341	4,716	7%	8,488

Wages

The labor market endorsement in this report considers the hourly wages for the two occupations of interest in Los Angeles County, as they relate to the county's self-sufficiency standard wage. Orange County wages are included below in order to provide a complete analysis of the LA/OC region. Detailed wage information, by county, is included in Appendix A.

Los Angeles County – Both occupations have entry-level wages **below** the self-sufficiency standard wage for one adult (\$18.10 in Los Angeles County). Typical entry-level hourly wages are in a range between \$14.98 and \$17.53. Experienced workers can expect to earn wages between \$21.67 and \$25.26, which are above the self-sufficiency standard wage estimate.

Orange County – Both occupations have entry-level wages **below** the self-sufficiency standard wage for one adult (\$20.63 in Orange County). Typical entry-level hourly wages are in a range between \$15.28 and \$17.78. Experienced workers can expect to earn wages between \$22.10 and \$25.63, which are above the self-sufficiency standard wage estimate.

³ Five-year change represents new job additions to the workforce. Annual openings include new jobs and replacement jobs that result from retirements and separations.

Job Postings

Over the past 12 months, there have been 27,350 online job postings related to the two occupations of interest. Exhibit 2 displays the number of job postings by occupation. The majority of job postings (51%) were for *medical assistants*. The highest number of job postings were for medical assistants, medical receptionists, front desk receptionists, dental receptionists, and dental treatment coordinators. The top skills were scheduling, administrative support, front office, patient care, vital signs measurement, electronic medical records, and medical terminology. The top employers, by number of job postings, in the region were PIH Health, Optum, and University of California.

It is important to note that the job postings data included in this section reflects online job postings listed in the past 12 months and does not yet demonstrate the full impact of COVID-19. While employers have generally posted fewer online job postings since the beginning of the pandemic, the long-term effects are currently unknown.

Exhibit 2: Job postings by occupation (last 12 months)

Educational Attainment

The Bureau of Labor Statistics (BLS) lists the following typical entry-level education for the occupations in this report:

- **Postsecondary non-degree award:** *medical assistants (31-9092)*
- **High school diploma or equivalent:** *medical secretaries and administrative assistants (43-6013)*

In the LA/OC region, the majority of annual job openings (51%) typically require a high school diploma or equivalent. However, national-level educational attainment data indicates that between 53% and 65% of workers in the field have completed some college or an associate degree.

Educational Supply

Community College Supply – Exhibit 3 shows the annual and three-year average number of awards conferred by community colleges in programs that have historically trained for the occupations of interest. The colleges with the most completions in the region are Santa Ana, North Orange Adult, Saddleback, and Long Beach.

Exhibit 3: Regional community college awards (certificates and degrees), 2017-2020

Non-Community College Supply – For a comprehensive regional supply analysis, it is important to consider the supply from other institutions in the region that provide training programs for medical assisting occupations. Exhibit 4 shows the annual and three-year average number of awards conferred in relevant programs. Due to different data collection periods, the most recent three-year period of available data is from 2016 to 2019. Between 2016 and 2019, non-community college institutions in the region conferred an average of 3,319 awards.
