Labor Market Analysis: San Diego County

March 2023

### Summary

This brief provides labor market information about Architecture and Architectural Occupations to assist the San Diego and Imperial Counties Community Colleges with program development and strategic planning. Architecture and Architectural Occupations include "Architectural and Civil Drafters" and "Civil Engineering Technologists and Technicians." According to available labor market information, Architecture and Architectural Occupations in San Diego County have a labor market demand of 260 annual job openings (while average demand for a single occupation in San Diego County is 245 annual job openings), and eight institutions supply 101 awards for these occupations, suggesting that there is a supply gap in the labor market. On average, entry-level and median wages are above the living wage. This brief recommends that the colleges proceed with developing a new program and supports a program modification because 1) there is a supply gap in San Diego County; 2) entry-level earnings for this occupation are above the living wage; and 3) there is a medium number of annual job openings.

#### Introduction

This report provides labor market information in San Diego County for the following occupational codes in the Standard Occupational Classification (SOC)<sup>1</sup> system:

- Architectural and Civil Drafters (SOC 17-3011): Prepare detailed drawings of architectural and structural features of buildings or drawings and topographical relief maps used in civil engineering projects, such as highways, bridges, and public works. Use knowledge of building materials, engineering practices, and mathematics to complete drawings.
- Civil Engineering Technologists and Technicians (SOC 17-3022): Apply theory and principles of
  civil engineering in planning, designing, and overseeing construction and maintenance of structures
  and facilities under the direction of engineering staff or physical scientists.

For the purpose of this report, these occupations are referred to as Architecture and Architectural Occupations.

### **Projected Occupational Demand**

Between 2022 and 2027, Architecture and Architectural Occupations are projected to increase by 119 net jobs or six percent (Exhibit 1a). Employers in San Diego County will need to hire 260 workers annually to fill new jobs and backfill jobs due to attrition caused by turnover and retirement, for example.

## **Educational Supply**

Educational supply for an occupation can be estimated by analyzing the number of awards in related Taxonomy of Programs (TOP) or Classification of Instructional Programs (CIP) codes.<sup>8</sup> There are four TOP codes and eight CIP codes related to *Architecture and Architectural Occupations* (Exhibit 3).

Exhibit 3: Related TOP and CIP Codes for Architecture and Architectural Occupations9

According to TOP data, six community colleges supply the region with awards for these occupations:

Cuyamaca College, MiraCosta College, Palomar College, San Diego City College, San Diego Mesa

College, and Southwestern College. According to CIP data, two non-community-college institutions supply the region with awards: National University and Newschool of Architecture and Design (Exhibit 4).

## **Demand vs. Supply**

Comparing labor demand (annual openings) with labor supply<sup>10</sup> suggests that there is a supply gap for these occupations in San Diego County, with 260 annual openings and 101 awards. Comparatively, there are 2,612 annual openings in California and 1,673 awards, suggesting that there is also a supply gap across the state<sup>11</sup> (Exhibit 5).

Exhibit 5: Labor Demand (Annual Openings) Compared with Labor Supply (Average Annual Awards)

	<b>Demand</b> (Annual Openings)	<b>Supply<sup>12</sup></b> (Total Annual Average Supply)	Supply Gap or Oversupply
San Diego	260	101	159
California	2,612	1,673	939

**Please note:** This is a basic analysis of supply and demand of labor. The data does not include workers currently in the labor force who could fill these positions or workers who are not captured by publicly available data. This data should be used to discuss the potential gaps or oversupply of workers; however, it should not be the only basis for determining whether or not a program should be developed.

<sup>&</sup>lt;sup>10</sup> Labor supply can be found from two different sources: Lightcast or the California Community Colleges Chancellor's Office MIS Data Mart. Lightcast uses CIP codes while MIS uses TOP codes. Different coding systems result in differences in the supply numbers.

## **Student Outcomes and Regional Comparisons**

According to the California Community Colleges LaunchBoard, 43 to 60 percent of students in the San Diego-Imperial region earned a living wage after completing a program related to *Architecture and Architectural Occupations*, compared 40 to 79 percent statewide and 52 percent of students in Career Education programs in general across the state (Exhibit 6a).<sup>13</sup>

## **Online Job Postings**

This report analyzes not only historical and projected (traditional LMI) data, but also recent data from online job postings (real-time LMI). Online job postings may provide additional insight about recent changes in the labor market that are not captured by historical data. Between 2018 and 2022, there was an average of 262 online job postings per year for *Architecture and Architectural Occupations* in San Diego County (Exhibit 7). Please note that online job postings do **not** equal labor market demand; demand is represented by annual job openings (see Exhibit 1b). While this brief includes online jobs postings data to help with curriculum development, the community colleges should note that this type of data is impacted by several variables: employers may post a position multiple times to increase the pool of applicants; a job posting can remain posted after a business decides not to fill a position; or an employer may use one posting to fill multiple positions, for example.
