|  Do Not Proceed with New Program |   |   | <input type="checkbox"/> Doctorate Degree <input checked="" type="checkbox"/> Master's Degree <input type="checkbox"/> Bachelor's Degree <input type="checkbox"/> Associate Degree <input type="checkbox"/> Some College or Certificate <input type="checkbox"/> HS Diploma or Equivalent <input type="checkbox"/> Less than a HS Diploma <input type="checkbox"/> Apprenticeship |
| SUPPORT FOR PROGRAM MODIFICATION? | NUMBER OF INSTITUTIONS THAT PROVIDE TRAINING | NUMBER OF ANNUAL JOB OPENINGS | |
|   | HIGH  | MEDIUM  | |

This brief provides labor market information about *Geographic Information System Occupations* to assist the San Diego and Imperial Counties Community Colleges with program development and strategic planning. *Geographic Information System Occupations* include “Cartographers and Photogrammetrists,” “Geographers,” and “Surveying and Mapping Technicians.” According to available labor market information, *Geographic Information System Occupations* in San Diego County have a labor market demand of 93 annual job openings (while average demand for a single occupation in San Diego County is 289 annual job openings), and eight institutions supply 99 awards for these occupations, suggesting that supply is met in the labor market. On average, entry-level and median wages are above the living wage. This brief recommends not proceeding with developing a **new** program for these occupations but supports a program modification because although 2) entry-level wages are above the living wage, 2) supply is met in the region. The colleges should note that **employers typically require a master’s degree or higher as the minimum educational requirement for these occupations.**

Introduction

This report provides labor market information in San Diego County for the following occupational codes in the Standard Occupational Classification (SOC)¹ system:

- **Cartographers and Photogrammetrists** (SOC 17-1021): Research, study, and prepare maps and other spatial data in digital or graphic form for one or more purposes, such as legal, social, political, educational, and design purposes. May work with Geographic Information Systems (GIS). May design and evaluate algorithms, data structures, and user interfaces for GIS and mapping systems. May collect, analyze, and interpret geographic information provided by geodetic surveys, aerial photographs, and satellite data.
- **Geographers** (SOC 19-3092): Study the nature and use of areas of the Earth's surface, relating and interpreting interactions of physical and cultural phenomena. Conduct research on physical aspects of a region, including land forms, climates, soils, plants, and animals, and conduct research on the spatial implications of human activities within a given area, including social characteristics, economic activities, and political organization, as well as researching interdependence between regions at scales ranging from local to global.
- **Surveying and Mapping Technicians** (SOC 17-3031): Perform surveying and mapping duties, usually under the direction of an engineer, surveyor, cartographer, or photogrammetrist, to obtain data used for construction, mapmaking, boundary location, mining, or other purposes. May calculate mapmaking information and create maps from source data, such as surveying notes, aerial photography, satellite data, or other maps to show topographical features, political boundaries, and other features. May verify accuracy and completeness of maps.

For the purpose of this report, these occupations are referred to as *Geographic Information System Occupations*.

¹ The Standard Occupational Classification (SOC) system is used by federal statistical agencies to classify workers into occupational categories for the purpose of collecting, calculating, or disseminating data. [bls.gov/soc](https://www.bls.gov/soc).

Projected Occupational Demand

Between 2022 and 2027, *Geographic Information System Occupations* are projected to increase by **59** net jobs or **eight** percent (Exhibit 1 a). Employers in San Diego County will need to hire **93** workers annually to fill new jobs and backfill jobs due to attrition caused by turnover and retirement, for example.

Exhibit 1a: Number of Jobs for Geographic Information System Occupations (2012-2027)²

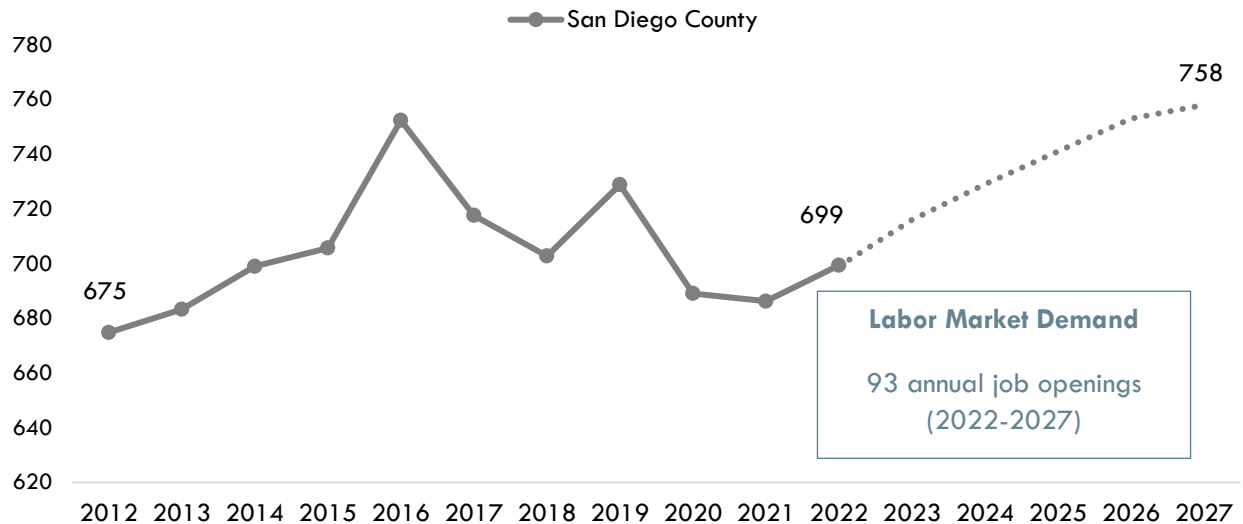

Exhibit 1 b disaggregates the projected number of jobs change by occupation. “Surveying and Mapping Technicians” are projected to have the most labor market demand between 2022 and 2027, with **78** annual job openings.

Exhibit 1b: Number of Jobs for Geographic Information System Occupations in San Diego County (2022-2027)³

| Occupational Title | 2022 Jobs | 2027 Jobs | 2022 - 2027 Net Jobs Change | 2022-2027 % Net Jobs Change | Annual Job Openings (Demand) |
|-------------------------------------|------------|------------|-----------------------------|-----------------------------|------------------------------|
| Surveying and Mapping Technicians | 530 | 577 | 47 | 9% | 78 |
| Cartographers and Photogrammetrists | 161 | 171 | 10 | 6% | 14 |
| Geographers | 8 | 10 | 2 | 25% | 1 |
| Total | 699 | 758 | 59 | 8% | 93 |

³ Lightcast 2023.01; QCEW, Non-QCEW, Self-Employed.

Earnings

Exhibit 2a disaggregates hourly earnings by occupation. The entry-level hourly earnings for *Geographic Information System Occupations* range from \$17.80 to \$35.04.

Exhibit 2a: Hourly Earnings for Geographic Information System Occupations in San Diego County⁴

| Occupational Title | Entry-Level Hourly Earnings (25 th Percentile) | Median Hourly Earnings | Experienced Hourly Earnings (75 th Percentile) |
|-------------------------------------|---|------------------------|---|
| Geographers | \$35.04 | \$43.78 | \$53.47 |
| Surveying and Mapping Technicians | \$28.31 | \$29.24 | \$37.86 |
| Cartographers and Photogrammetrists | \$17.80 | \$29.62 | \$46.55 |

On average, the entry-level hourly earnings for *Geographic Information System Occupations* are \$27.05; this is more than the living wage for a single adult in San Diego County, which is \$18.43 per hour (Exhibit 2b).⁵

Exhibit 2b: Average Hourly Earnings⁶ for Geographic Information System Occupations in San Diego County⁷

⁵ "Family Needs Calculator (formerly the California Family Needs Calculator)," Insight: Center for Community Economic Development, last updated 2021. insightccd.org/family-needs-calculator/.

⁶ 10th and 25th percentiles could be considered entry-level wages, and 75th and 90th percentiles could be considered experienced wages for individuals who may have been in the occupation longer, received more training than others, etc.

⁷ Lightcast 2023.01; QCEW, Non-QCEW, Self-Employed.

Educational Supply

Educational supply for an occupation can be estimated by analyzing the number of awards in related Taxonomy of Programs (TOP) or Classification of Instructional Programs (CIP) codes.⁸ There are six TOP codes and eight CIP codes related to *Geographic Information System Occupations* (Exhibit 3).

Exhibit 3: Related TOP and CIP Codes for Geographic Information System Occupations⁹

| TOP or CIP Code | TOP or CIP Program Title |
|-----------------|--|
| TOP 0301.00 | Environmental Science |
| TOP 0302.00 | Environmental Studies |
| TOP 0957.30 | Surveying |
| TOP 1930.00 | Earth Science |
| TOP 2206.00 | Geography |
| TOP 2206.10 | Geographic Information Systems |
| CIP 15.1102 | Surveying Technology/Surveying |
| CIP 30.3501 | Climate Science |
| CIP 30.3801 | Earth Systems Science |
| CIP 30.4101 | Environmental Geosciences |
| CIP 30.4401 | Geography and Environmental Studies |
| CIP 43.0407 | Geospatial Intelligence |
| CIP 45.0701 | Geography |
| CIP 45.0702 | Geographic Information Science and Cartography |

⁸ TOP data comes from the California Community Colleges Chancellor's Office MIS Data Mart (datamart.cccco.edu) and CIP data comes from the Integrated Postsecondary Education Data System (nces.ed.gov/ipeds/use-the-data).

⁹ This brief uses a conservative estimate of program supply and only calculates awards from the TOP codes in Exhibit 3.

According to TOP data, seven community colleges supply the region with awards for these occupations: Cuyamaca College, Grossmont College, Palomar College, San Diego City College, San Diego Mesa College, San Diego Miramar, and Southwestern College. According to CIP data, one non-community-college institution supplies the region with awards: San Diego State University (Exhibit 4).

Demand vs. Supply

Comparing labor demand (annual openings) with labor supply¹⁰ suggests that supply is met for these occupations in San Diego County, with 93 annual openings and 99 awards. Comparatively, there are 788 annual openings in California and 1,229 awards, suggesting that there is an oversupply across the state¹¹ (Exhibit 5).

Exhibit 5: Labor Demand (Annual Openings) Compared with Labor Supply (Average Annual Awards)

| | Demand (Annual Openings) | Supply ¹² (Total Annual Average Supply) | Supply Gap or Oversupply |
|------------|--------------------------------|--|-----------------------------|
| San Diego | 93 | 99 | 6 |
| California | 788 | 1,229 | 441 |

Please note: This is a basic analysis of supply and demand of labor. The data does not include workers currently in the labor force who could fill these positions or workers who are not captured by publicly available data. This data should be used to discuss the potential gaps or oversupply of workers; however, it should not be the only basis for determining whether or not a program should be developed.

¹⁰ Labor supply can be found from two different sources: Lightcast or the California Community Colleges Chancellor's Office MIS Data Mart. Lightcast uses CIP codes while MIS uses TOP codes. Different coding systems result in differences in the supply numbers.

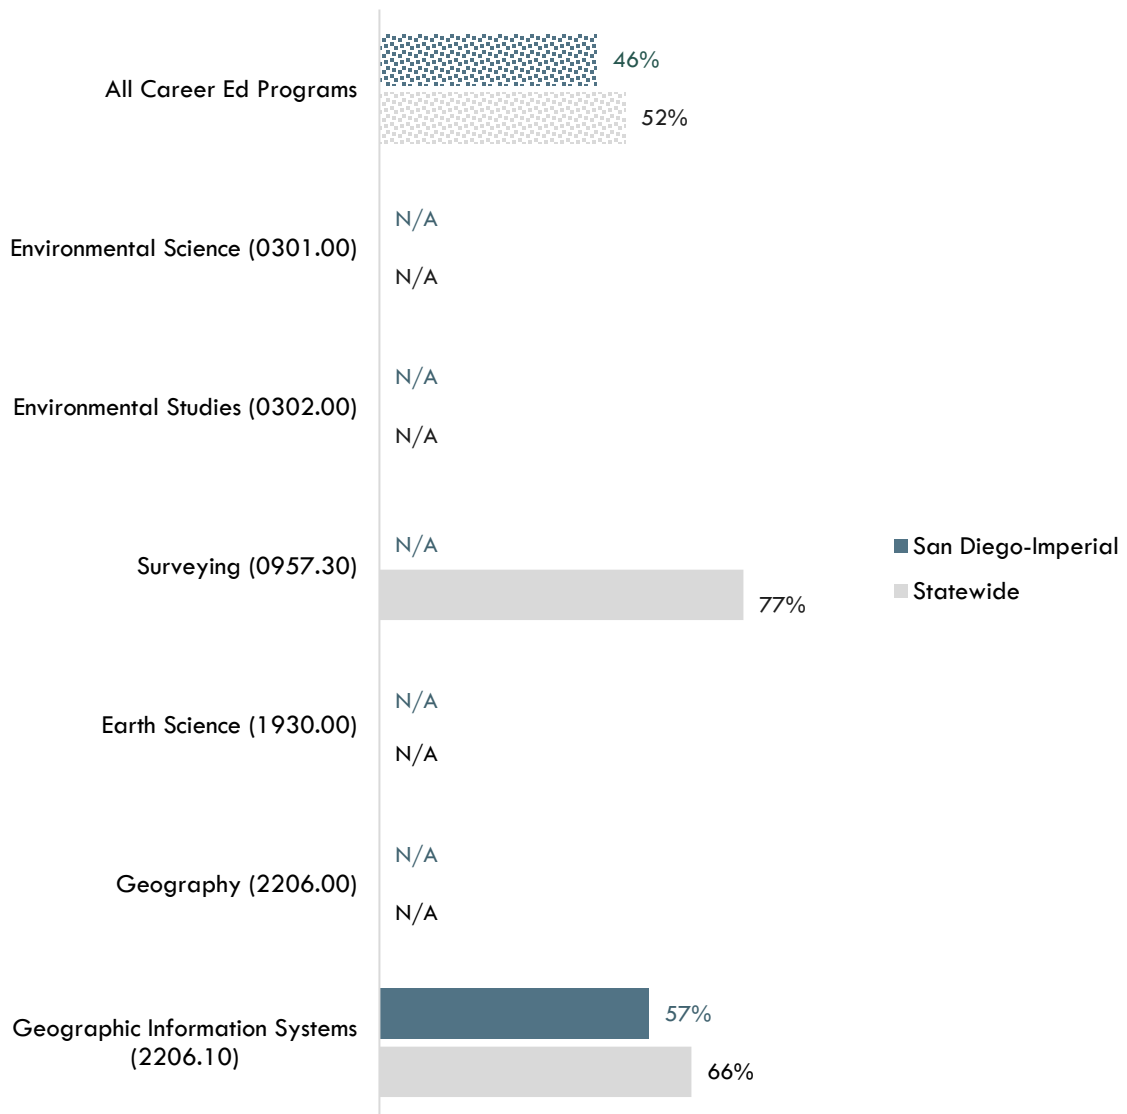

¹¹ "Supply and Demand," Centers of Excellence Student Outcomes, <https://coecc.net/our-resources/>.

¹² Awards included: associate degree; award <1 year; award 1<2 years; and postsecondary awards.

Student Outcomes and Regional Comparisons

According to the California Community Colleges LaunchBoard, 57 percent of students in the San Diego-Imperial region earned a living wage after completing a program related to *Geographic Information System Occupations*, compared 66 to 77 percent statewide and 52 percent of students in Career Education programs in general across the state (Exhibit 6a).¹³

"N/A" indicates insufficient data

¹³ "California Community Colleges Strong Workforce Program," California Community Colleges, calpassplus.org/LaunchBoard/SWP.aspx.

¹⁴ Most recent year with available data is Program Year 2019-20. Among completers and skills builders who exited, the percentage of students who attained a living wage.

According to the California Community Colleges LaunchBoard, 90 percent of students in the San Diego-Imperial region obtained a job closely related to their field of study after completing a program related to *Geographic Information System Occupations*, compared to 79 to 92 percent statewide and 73 percent of students in Career Education programs in general across the state (Exhibit 6b).¹⁵

Exhibit 6b: Percentage of Students in a Job Closely Related to Field of Study by Program, PY2018-19¹⁶

"N/A" indicates insufficient data

¹⁵ "California Community Colleges Strong Workforce Program," California Community Colleges, calpassplus.org/LaunchBoard/SWP.aspx.

¹⁶ Most recent year with available data is Program Year 2018-19. Percentage of Students in a Job Closely Related to Field of Study: Among students who responded to the CTEOS, the percentage reporting employment in the same or similar field as their program of study.

Online Job Postings

This report analyzes not only historical and projected (traditional LMI) data, but also recent data from online job postings (real-time LMI). Online job postings may provide additional insight about recent changes in the labor market that are not captured by historical data. Between 2019 and 2022, there was an average of 277 online job postings per year for *Geographic Information System Occupations* in San Diego County (Exhibit 7). Please note that online job postings do **not** equal labor market demand; demand is represented by annual job openings (see Exhibit 1 b). While this brief includes online jobs postings data to help with curriculum development, the community colleges should note that this type of data is impacted by several variables: employers may post a position multiple times to increase the pool of applicants; a job posting can remain posted after a business decides not to fill a position; or an employer may use one posting to fill multiple positions, for example.
