SUMMARY

This report analyzes whether local labor market demand is being met by community college programs aligned with the identified middle-skill occupations¹ or whether a shortage of workers exists. Labor market demand is measured by annual job openings while education supply is measured by the number of awards (degrees and certificates) conferred on average each year.

Based on the available data, there appears to be a supply gap for the three identified middle-skill occupations in the region. While the majority of annual openings have entry-level wages that are below the self-sufficiency standard wage in both Los Angeles and Orange counties, more than one-third of current workers in the field have completed some college or an associate degree as their highest level of education.

Recommendation: Due to two or three program endorsement criteria being met, the Los Angeles Center of Excellence for Labor Market Research (LA COE) endorses this proposed program.

Key Findings

Supply Gap

- 2,561 annual job openings are projected in the region through 2029. This number is greater than the three-year average of 15 awards conferred by educational institutions in the region.

¹ Middle-skill occupations typically require some postsecondary education, but less than a bachelor’s degree. The COE classifies middle-skill jobs as the following:

- All occupations that require an educational requirement of some college, associate degree or apprenticeship;
- All occupations that require a bachelor’s degree, but also have more than one-third of their existing labor force with an educational attainment of some college or associate degree; or
- All occupations that require a high school diploma or equivalent or no formal education, but also require short- to long-term on-the-job training where multiple community colleges have existing programs.

Living Wage

- 78% of annual job openings for these middle-skill insurance occupations have entry-level wages **below** Los Angeles County’s self-sufficiency standard hourly wage (\$24.03/hour).²

Educational Attainment

- 99% of the annual job openings typically require a high school diploma or equivalent for middle-skill occupations related to insurance in the LA/OC region.
- 34%-36% of workers in the field have completed some college or an associate degree, according to national educational attainment data.

Community college supply

- 4 community colleges issued awards related to insurance in the greater LA/OC region.
- 15 awards (degrees and certificates) were conferred on average each year between 2022 and 2024.

Other postsecondary supply

- Currently, there are no other postsecondary institutions in the greater LA/OC region that have conferred sub-baccalaureate awards for insurance-focused programs in the past three years.

TARGET OCCUPATIONS

LA COE prepared this report to provide regional labor market and postsecondary supply data related to three middle-skill occupations. [For full occupation descriptions, please see Appendix.](#)

- **Claims Adjusters, Examiners, and Investigators (13-1031)**³
- **Insurance Appraisers, Auto Damage (13-1032)**⁴
- **Insurance Sales Agents (41-3021)**⁵

OCCUPATIONAL DEMAND

Exhibit 1 shows the five-year occupational demand projections for these middle-skill insurance occupations. In the greater Los Angeles/Orange County region, the number of jobs related to these occupations is projected to decrease by 4% through 2029. However, there will be nearly 2,600 job openings per year through 2029 due to retirements and workers leaving the field. The majority of jobs in 2024 for these middle-skill insurance occupations (67%) were located in Los Angeles County.

Detailed Occupation Data

Exhibit 2 displays the current employment and projected occupational demand for each of the target occupations in Los Angeles County. The average percentage of workers aged 55+ across all occupations in the Los Angeles/Orange County region is 26%; occupations with a larger share of workers aged 55 and older typically have greater replacement needs to offset the amount of impending retirements. On average, 81% of workers across all occupations in California are employed full-time.
